

Inactive product audit

Complete production-catalog snapshot of all paused DALO eSIM products. This report separates loss-making tariffs from intentionally paused large-data plans and products requiring a commercial review.

317**PAUSED PRODUCTS**

Not visible in quiz or recommendations

120**NEGATIVE PROFIT**

Do not activate before repricing

136**LARGE DATA**

50/100GB with non-negative profit

Management recommendation

Keep all 120 loss-making tariffs paused until selling prices are recalculated. Review the 136 profitable 50/100GB plans only for destinations where premium demand is realistic. Manually review the remaining 61 products for provider availability, regional overlap, market relevance and price competitiveness. No paused product should be bulk-activated without a provider and margin check.

Classification rules

Negative profit: selling price is below purchase price. Large data: 50GB or 100GB and non-negative profit. Other paused: every remaining inactive product. Counts are mutually exclusive and total 317.
